Mitchell Electronics, Inc. Software Credit Platform

The Mitchell Electronics, Inc. credit platform puts you in control of your servo motor repairs with instant access to all of our current software options. Purchase credits in advance and apply those credits to “checkout” the software for use under the Mitchell Electronics, Inc. [software license](#).

CREDITS

Credits are valid for one year after purchase and can be applied to any TI-5000JX or TI-3000JX tester across your company. The WinTI5000JX PC software displays the total number of credits remaining, the number of credits each use costs, and how much time is remaining on the current checkout. You can purchase credits in various quantities which are made accessible via the internet. You should top-up your credits whenever they get low.

Order Credits

Place your order online, email, or call. Mitchell Electronics, Inc. will send you an invoice for the order.

(740) 594-8532

Acknowledge New Credits

A new credit top-up will immediately appear in the software after the purchase is complete. This requires internet access on the PC using the software.

Checkout Software

Simply click the ‘Checkout Software’ button to access all software options.

CHECKOUTS

The cost and duration of credit checkouts for the TI-5000JX and TI-3000JX are shown below:

	Checkout Cost	Checkout Period
TI-5000JX	4 credits	30 Minutes
TI-3000JX	4 credits	30 Minutes

These figures were designed to maximize the value of the software while minimizing the cost. The work accomplished during one Checkout Period depends on many circumstances. The goal is to provide an on-demand platform which is easy to use and provides access to all of our latest software.
